“TRANSCRIPT”

S – Simon **B** – Bach

S Welcome to *Fact or Fiction?*, the programme in which we investigate some of the world's greatest mysteries. Today we are joined by Dr. Steven Bach to look at the unsolved case of the Nazca lines. Dr Bach, where are these lines located?

B Good evening. Well, the Nazca lines are in the Atacama Desert in Peru. There's some evidence to suggest they were created by the Nazca people about 2,000 years ago but we don't know exactly when or why they were created.

S Interesting. What do the lines look like?

B This is what's so fascinating. There are hundreds of different lines. Some of them are straight lines, some of them are geometric shapes, while others are pictures of animals and birds. In total there are around 300 of them.

S Amazing. How were they made? Are there any clues?

B Not really. The strange thing is they are extremely big. The only way to see them properly is from the sky.

S Yes. We have some pictures here that were taken by satellite. They look incredible.

B I agree.

S Why were they created? What was their purpose? Do we know?

B Many people think they were made for religious reasons. It is quite possible that they were designed so that they could be seen by gods in the sky.

S Were they used by aliens? I understand that's one of the theories.

B That's correct. Some people believe our planet was visited by aliens from another planet in the past. They say the lines were used by the aliens to land their spaceships on. A bit like runways at an airport.

S That's incredible.
